EDUCATION

Vellore Institute of Technology

Sep 2022 – Sep 2027

Master of Technology (Integrated) - Computer Science & Engineering (Cyber Security)

CGPA: 8.77

Relevant Coursework: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating Systems, Computer Networks

Kendriya Vidyalaya No. 2 NSB Visakhapatnam

2021

Higher Secondary School Certificate (Class XII)

Grade: 87.6%

TECHNICAL SKILLS

Programming & Scripting: Python, C++, JavaScript, TypeScript, SQL

Backend & APIs: FastAPI, Node.js, REST APIs, PostgreSQL, MongoDB, MySQL

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, HTML5, CSS3

AI/ML: Scikit-learn, Gemini API, Prompt Engineering, REST-based LLM Integration

Data & Pipelines: Supabase, PostgreSQL, Web Scraping (Firecrawl), Automated Scheduling

Cloud & Tools: AWS, Vercel, Git, GitHub, Docker, Postman

INTERNSHIP EXPERIENCE

Web Engineering Intern

Apr 2025 – Jun 2025

Cyber Jagrithi Foundation, Remote

- Built and deployed 8+ full-stack web applications using React.js and Node.js, handling both frontend UI and backend API integration for platforms serving 3000+ users
- Worked within a 6-member cross-functional team to scope, build, and ship features across design, development, and QA — delivering projects 40% faster through agile iteration
- Automated client-side validation and compliance checks across 5+ applications, cutting audit rework by 45% and improving data reliability across user submissions

PROJECTS

BEAT-WELL – AI Heart Disease Prediction Platform

April 2025

Next.js, FastAPI, Python, Tailwind CSS, Scikit-learn, AWS Amplify | [Live Demo](#)

- Built end-to-end: React/Next.js frontend, FastAPI backend, and a Scikit-learn classification model trained on clinical data — achieving 85% prediction accuracy across 8+ health inputs
- Designed the full data pipeline from user input to model inference: input validation, feature normalization across 6+ health metrics (BMI, blood pressure categories), model call, and structured API response
- Integrated a Gemini API-powered medical chatbot as a REST-connected component, handling user queries with prompt-engineered responses scoped to health Q&A
- Optimized end-to-end response time from 2.3s to 1.4s via PostgreSQL query tuning and client-side caching; deployed on AWS Amplify with support for concurrent users

Tracklet – Automated Price Tracking Pipeline

Dec 2025

Next.js, TypeScript, Firecrawl, Supabase (PostgreSQL), Tailwind CSS, Shadcn UI, Resend | [Live Demo](#)

- Built a data pipeline that scrapes, normalizes, and stores price data for 50+ products across multiple e-commerce sites — processing 200+ price updates daily with zero manual intervention
- Designed a scheduled execution system that runs price checks throughout the day, maintains 30 days of price history in PostgreSQL, and surfaces trend data through a React dashboard
- Implemented an automated alerting system using Resend that triggers email notifications to 100+ users when tracked product prices drop by 15%+, reducing manual monitoring by 90%

CERTIFICATES & PROFESSIONAL DEVELOPMENT

- Databases and SQL for Data Science – IBM (2025) [\[View\]](#)
- Google IT Support Professional - Computer Networking – Coursera (2023) [\[View\]](#)

ACHIEVEMENTS & AWARDS

- Achieved **National Cadet Corps (NCC) 'A' Certificate** with 'A' Grade during school years
- Participated in **State Level Social Science Exhibition** (2x participant) during school years
- Competed in **KVS Regional Sports Championship - Cricket** during school years
